

Testcase Repository			
Project Name	Any.do mobile Application		
Prepared By	Ayman ElGendy		
Prepared For	InstaBug		
Application Type	IOS Mobile Application		
App. Version	5.46.6		
Date	10/11/2024		
Quick Test Summary Report			
Total no. of Test Suits	20		
Total no. of Test Scenarios	59		
Total no. of Test Cases Executed	TOTAL	PASS	40
		FAIL	18
		N/A (Not applicable, Not Assessed)	1
	61	N/E (Not evaluated)	2
Total no. of Defects	15		
Approval Time	Pending		
Approved By	Not Yet		

Notes	-Some of test scenarios/cases that requires further discussion because, it differs from someone to another as there is no Software requirements specifications.
	-The Priority/Severity differs as per requirements to meet the customer expectation but I have estimated according to business impact.
Whole Excel Sheet: CheckList	-This is good coverage of mobile application different approaches, having in mind (No access to source code) or structure/architecture of the application.
Drive For Screenshots/videos: Bug Videos/Screenshots	
	- Would be great to discuss further updates, or any needed insights about the Test/Bug Report
	- There is a collective link for all screenshots/videos There is a unique link for each bug. After I converted the sheet to md file for markdown file, many errors and data erased so I submitted the excel sheet

Test Case ID	Test Suite	Test Scenario	Test Case	Pre-Condition	Test Data	Test Steps	Expected Result	Actual Result	Status	Notes	Priority
TC_Signup_Valid_001	Signup Functionality	Verify Signup with Valid Data	Signup with Valid Email, Username and Password	Open Any.do mob Application Click on the mail icon bottom left	Email: aymantest85@gmail.com Username: Ayman_test Password: Ayman_test123	1.Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on Email field & Enter a valid email 3. Tap Continue 4. Tap on Username field & Enter a valid username 5. Tap on Password field & Enter a valid password (greater than 6 characters) 6. Tap on CREATE ACCOUNT	The user should be successfully signed up and redirected to the homepage or dashboard.	User successfully signed up and redirected to homepage	Pass		High
TC_Signup_Invalid_001		Verify Signup with Invalid Data	Verify signup fails with an already registered email	Already Registered Email	Email: aymantest85@gmail.com Password: Ayman_test123	1.Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on Email field & Enter a valid existing email <aymantest85@gmail.com> 3. Tap Continue 4. observe if user is directed to login page	After writing an existing valid email, User should be directed to another login page	User is directed to login page	Pass		Medium
TC_Signup_Invalid_002		Verify Signup with Invalid Data	Verify signup fails with an invalid email format	None	1st Email: ayman.com 2nd Email: ayman@com	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on email field and Enter invalid email format 3. Tap Continue 4. Observe continue button	The "Continue" button should be disabled and unclickable, preventing the user from proceeding.	The "Continue" button is disabled and unclickable, preventing the user from proceeding.	Pass		Medium
TC_Signup_Validation_001		Verify Field Validation	Verify the "Continue" button is disabled when the email field is empty	None	Email: <Empty>	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Leave the email field empty 3. Observe Continue button	The "Continue" button should be disabled and unclickable, preventing the user from proceeding.	The "Continue" button is disabled and unclickable, preventing the user from proceeding.	Pass		Medium
TC_Signup_Invalid_003		Verify Signup with Invalid Data	Verify signup fails with an invalid email format (domain name)	None	Email: ayman@k.com	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on email field and Enter invalid email format 3. Tap Continue 4. Observe error message	An error message should be displayed, indicating that the email format is invalid.	Signup proceeds to next page requesting (Full name,Password) , with no error messages display	N/A	Clarification Needed with the development team or specific validation rules/requirements. as Format wise TC Pass, but could fail because "h" is a very short domain name too.	Medium
TC_Signup_Invalid_004		Verify Signup with Invalid Data	Verify signup fails with a password less than 6 characters	None	Email: aymantest85@gmail.com Username: Ayman_test Password: Ayman	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on email field and Enter a valid email 3. Tap Continue 4. Tap on username field and Enter a valid username 5. Tap on password field and Enter a valid password (Less than 6 characters) 6. Tap on CREATE ACCOUNT	Signup fails and error message is display "Password must be at least 6 characters"	Signup fails and error message is display "Password must be at least 6 characters"	Pass		Medium
TC_Signup_Validation_002	Field Validation	Verify Field Validation	Verify the "Create Account" button is disabled when the username is empty	None	Email: aymantest85@gmail.com Username: <Leave Empty> Password: Ayman_test123	1.Tap on email field and Enter a valid email 2. Tap Continue 3. Leave username empty 4. Tap on password field and Enter a valid password (greater than 6 characters) 5. Observe CREATE ACCOUNT	The "Create Account" button should be disabled and unclickable when the username field is empty.	The "Create Account" button is disabled and unclickable when the username field is empty.	Pass		Medium
TC_Signup_Validation_003		Verify Field Validation	Verify the "Create Account" button is disabled when the password is empty	None	Email: aymantest85@gmail.com Username: Ayman_test Password: <Leave Empty>	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on email field and Enter a valid email 3. Tap Continue 4. Tap on username field Enter a valid username 5. Leave password empty 6. Observe CREATE ACCOUNT	The "Create Account" button should be disabled and unclickable when the password field is empty.	The "Create Account" is disabled and unclickable when the password field is empty.	Pass		Medium
TC_Login_Registered_001	Login Functionality	Verify Login Flow for Registered Users	Verify login flow when a registered email is entered	User has already signed up with a valid email and password	Email: aymantest85@gmail.com	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. Observe if the app moves to the password input page	The app should automatically navigate to the password input page & show "Welcome back!" title	The app proceeds to input password page with Welcome Back! title	Pass		High
TC_Login_Valid_001		Verify Login with Valid Credentials	Verify login with a valid registered email and password	User has already signed up with valid credentials	Email: aymantest85@gmail.com Password: Ayman_test123	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. On the next page, enter the valid password	The user should be successfully logged in, and the app should navigate to the home screen or dashboard.	The user successfully login to the app home screen	Pass		High
TC_Login_Invalid_001		Verify Login with Incorrect Password	Verify login fails with a correct registered email but incorrect password	User has already signed up with valid credentials	Email: aymantest85@gmail.com Password: ayman_test123	1.Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. Enter an incorrect password on the next page	An error message should be displayed, indicating incorrect credentials, and the user should not be logged in. error message "Email & Password don't match,please try again"	User not logged in and error msg is displayed "Email & Password don't match,please try again"	Pass		Medium

TC_Login_Invalid_002		Verify Login with Empty Password	Verify login fails with a correct registered email but empty password	User has already signed up with valid credentials	Email: aymantest85@gmail.com Password: <Leave empty>	1.Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. Leave password field Empty	An error message should be displayed, indicating incorrect credentials, and the user should not be logged in. error message "Email & Password don't match,please try again"	User not logged in and error msg is displayed "Email & Password don't match,please try again"	Pass		Low
TC_PasswordRecovery_001	Password Recovery	Verify Password Recovery	Verify entering a registered email and receiving a reset password email	User has a registered email	Email: aymantest85@gmail.com	1.Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. tap on "Forgot Password?" 4. Enter the valid Email 5. Tap recover Password	A success message should be displayed: "Check your inbox for instructions..." and an email should be received.	Message is displayed "Check your inbox for instructions.." and email is received with password reset	Pass		High
TC_PasswordRecovery_002		Verify Invalid Email in "Forgot Password"	Verify invalid email format is not accepted in "Forgot Password" field	None	Email: aymantest12345@gmail.com	1.Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. tap on "Forgot Password?" 4. Enter invalidEmail 5. Tap recover Password	No email should and An error message should be displayed: "Nope, couldn't find this email. Please sign up."	No Email is sent and error message is displayed "Nope, couldn't fin this email. Please sign up."	Pass		Medium
TC_PasswordRecovery_003		Verify Password Change Works After Recovery	Verify changed password is working correctly after recovering password	User requested Password Change	Email: aymantest85@gmail.com Password: Ayman_test1234	1. Open the mail recieved 2. Tap on the reset password link 3. Enter new desired password <Ayman_test1234> 4. Re Enter correct desired password <Ayman_test1234> 5. open Any.do mobile app & click on mail icon bottom left 6.tap on email field on first page and enter registerd email 7. Enter the new password <Ayman_test1234> 8. submit & Close application 9. Login with the registered email and new password	The user should be successfully logged in, and the app should navigate to the home screen or dashboard.	The user successfully login to the app home screen	Pass	Checked the match between two password in the recover section and it also passed	High
TC_Login_Social_001	Login Functionality	Verify Social Login	Verify logging in with "Continue with google"	User has a registered google/gmail account	Saved Private/Own account on iphone	1. Tap on Continue with google 2. Tap continue 3. Choose desired Email <aymantest85@gmail.com> 4. Tap continue	The user should be successfully logged in, and the app should navigate to the home screen or dashboard.	The user successfully login to the app home screen	Pass		Medium
TC_Login_Social_002		Verify Social Login	Verify logging in with "Sign in with apple"	User has a registered Apple account	Saved Private/Own account on iphone	1.Tap on sign in with apple 2. choose the account 3. lock in face id / pin / password 4. proceed	The user should be successfully logged in, and the app should navigate to the home screen or dashboard.	The user successfully login to the app home screen	Pass		Medium
TC_Profile_SignOut_001	Profile Management	Verify Sign Out Functionality	Verify sign out is working	User has an account and inside the application (Logged in)	User is Logged	1. tap on My Day icon or next 7 days or all tasks or calender icon bottom left 2. tap on options (3 dots) from top right 3. tap on settings 4. tap on profile 5. tap on sign out 6. tap on yes after message displayed	The user should successfully sign out , and the app should navigate back to the main sign up/in menu.	The user successfully sign out , and the app navigate back to the main sign up/in menu.	Pass		High
TC_Profile_PasswordReset_001		Verify Password Reset Functionality	Verify Rest Password Option is Working	User has an account and inside the application (Logged in)	User is Logged Email: aymantest85@gmail.com	1. tap on My Day icon or next 7 days or all tasks or calender icon bottom left 2. tap on options (3 dots) icon from top right 3. tap on settings 4. tap on profile 5. tap on forget password 6. Enter the valid email <aymantest85@gmail.com>	A success message should be displayed: "Check your inbox for instructions..." and an email should be received.	Message is displayed "Check your inbox for instructions.." and email is received with password reset	Pass		High
TC_Profile_UsernameChange_001		Verify Username Change	Verify Changing username	User has an account and inside the application (Logged in)	User is Logged Old Username: Ayman_test New Username: Ayman_test13	1. tap on My Day icon or next 7 days or all tasks or calender icon bottom left 2. tap on options (3 dots) icon from top right 3. tap on settings 4. tap on profile 5. tap the pencil beside username 6. Enter the new username <Ayman_test13> 7. tap on done	The existing username should be updated to the new username	The existing username is updated to the new username	Pass		Low
TC_Profile_DeletePicture_001		Verify Profile Picture Deletion	Verify Deleting Profile Picture	User has a Profile Picture Uploaded	None	1. tap on My Day icon or next 7 days or all tasks or calender icon bottom left 2. tap on options (3 dots) icon from top right 3. tap on settings 4. tap on profile 5. tap on Edit under Profile Picture	Delete Picture Option should be there to delete the profile picture	No delete profile picture option, you can't delete your profile picture once uploaded	Fail	Even though it might be not required or stated in the requirements but it is crucial to have this option "What is a user uploaded wrong photo" and doesn't want to choose another one but wants to delete it?	Low
TC_OptionsMenu_Open_001	Options Menu Functionality	Verify Options Menu Opens and Closes Properly	Verify that tapping the three-dot icon opens the options menu	None	None	1. tap on My Day icon or next 7 days or all tasks or calender icon bottom left 2. tap on options (3 dots) icon from top right	The options menu (sync, print, share, My Calender, import, settings) should open with all icons visible.	The options menu (sync, print, share, My Calender, import, settings) is open with all icons visible.	Pass		Low
TC_OptionsMenu_Close_001		Verify Options Menu Opens and Closes Properly	Verify tapping outside the options menu closes it	None	None	1. tap on My Day icon or next 7 days or all tasks or calender icon bottom left 2. tap on options (3 dots) icon from top right 3. tap outside the fram of options	The options menu should close when tapping outside of it.	The options menu closes when tapping outside of it.	Pass		Low

TC_OptionsMenu_Sync_01	Sync Functionality	Verify Sync Option Functionality	Verify the sync option syncs data successfully	App is connected to the internet	None	1. Connect to the internet 2. tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 3. tap on options (3 dots) icon from top right 4. tap on sync/refresh icon	The app should sync the data and display a success message (e.g., "Last Sync: Just now").	The app syncs the data and display a success message (e.g., "Last Sync: Just now").	Pass		High
TC_OptionsMenu_Sync_02		Verify Sync Option Functionality	Verify the sync option displays an error when offline	App is not connected to the internet	None	1. Disconnect from the internet 2. tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 3. tap on options (3 dots) icon from top right 4. tap on sync/refresh icon	The app should display an error message (e.g., "No internet connection").	Sync Icon is not reachable/undclickable and The app doesn't display an error message "It displays Last Sync: [Counts from the last sync] ex. Just Now, minute ago, ..."	Fail		High

Notifications and alerts is clearly visible and correctly formatted, without overlapping or cutting off text.	Pass		Low
TC_TaskCreation_001	Negative Testing	Task Creation with Long Title	Test how the app handles task creation when the title field exceeds normal length	App is launched	Task Data: <Very Long Text>	1.Open any.do app, tap on next 7 days icon on bottom 2. tap on "I want to..." and Enter the data <Very Long Text>	App should display a warning or give a certain maximum length	App takes any length of task title length with no restrictions	N/E		Low
TC_TaskCreation_002		Corrupt File Upload	Test the app's response to uploading a corrupt or unsupported file format (e.g., a damaged image or system file).	1.App is launched 2.Existing Task	Uploaded File: .data file found on my iphone	1. open any.do app, tap on my list 2. navigate to a created task <Prepare Dinner> 3. add random/unsupported file <.data> 4. upload and observe the task attachments	App should give a warning or reject the file format	App uploads the file but it cannot be displayed (i.e has no effect)	N/E		Medium
TC_Profile_UploadVideoProfilePic_001		Verify Correct Profile Picture Format	Verify Correct Profile Picture Format when updating profile picture	None	Video in gallery	1. tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 2. tap on options (3 dots) icon from top right 3. tap on settings 4. tap on profile 5. tap on Edit under Profile Picture	User should be able to upload a profile picture in a picture format & handle/reject video format	User is able to upload a video in profile picture without giving any warnings/errors	Fail	It is true that the user cannot have a video as a profile picture but the concept of allowing it from root is not right	Medium
TC_TaskSync_001	Reliability Testing	Interrupting Task Synchronization	Test how the app responds when force closing the app during task synchronization and re-opening the app after.	1.App is launched 2.Existing Task	Upload File: 30MB PDF	1. open any.do app, tap on my list 2. navigate to a created task <Prepare Lunch> 3. add any pdf <Fitness PDF> 4. tap on upload the pdf and close the app 5. open the app again and navigate to the task 6. observe the task attachments	App should either have the attachment uploaded or at least give a warning that it couldnt upload needed attachment	App doesn't upload the attachment and no warning or any other triggering events happens	Fail		High
TC_Interrupt_Login_001		Interrupting Account login in	Test the app's ability to handle a forced closure during the account sign in process and how it resumes upon re-opening the app.	None	Email: aymantest85@gmail.com Password: Ayman_test123	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. On the next page, enter valid password 4. Tap on sign in & once it starts loading close the app 5. re open and observe app behavior	App should either normally continue/open homepage normally or display error to re login	App shows irrelevant error message "Cannot Complete Upgrade, Please Verify you have internet connection to complete application upgrade" but proceeds to homepage normally and opens the app.	Fail		High
TC_TaskAttachments_001	Performance Testing	Uploading Large Attachments	Test if the app crashes or becomes unresponsive when uploading a large file as a task attachment.	None	Video Attachment: 760MB	1. open any.do app, tap on my list 2. navigate to a created task <Prepare Breakfast> 3. add large video <760MB> 4. tap on upload the video 6. observe the app responsiveness	The app should normally respond and no crash should happen	The app automatically compresses the video and upload the attachment normally	Pass		High
TC_Security_PasswordReset_001	Security Testing	Verify Password Reset Link Security	Verify that the password reset link expires after a certain period (e.g., 24 hours).	Recieved Password Recovery mail	None	1. Request password recovery mail 2. wait 48 hours 3. open the requested password recovery mail 4. observe if the recovery link expires after this period	Password reset link should expire after a certain period (24hrs)	password reset link never expires and can be used after 24 hours	Fail		High
TC_Security_PasswordReset_002		Verify Single-Use Password Reset Link	Verify that the password reset link can only be used once and becomes invalid after use.	Recieved Password Recovery mail	1st Password: Ayman_test123 2nd Password: Ayman_test1234 3rd Password: Ayman_test123	1. Request password recovery mail 2. open the requested password recovery mail 3. recover the password to <Ayman_test123> 4. Login with recovered password 5. signout 6. Open the password recovery mail 7. recover the password to <Ayman_test1234> 8. Login with recovered Password	Password reset link should be only used once for each request and become invalid after	Password reset link can be user over and over again (no restrictions)	Fail		High
TC_Security_PasswordReset_003		Verify Password Policy Enforcement	Verify that the user cannot set the new password to be the same as the old password during password reset.	Recieved Password Recovery mail	Old Password: Ayman_test123 New Password: Ayman_test123	1. Request password recovery mail 2. open the requested password recovery mail 3. recover to New Password <Ayman_test123> (i.e Old Password is Ayman_test123) 4. Observer for any warnings / rejections 5. login with recovered password	User should not be able to use the same old password for the new password for better security reasons	User can set the new password same as the old password without any problems	Fail		High
TC_Security_PasswordMasking_001		Verify Password Input Masking	Verify that the password input field masks the input characters (e.g., shows asterisks or dots).	None	Password; Ayman_test123	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. On the next page, enter the valid password 4. Observe password text field	Password input field should mask input characters with asterisks	Password input field input characters are masked with asterisks	Pass		Medium
TC_Security_AccountLockout_001		Verify Account Lockout Policy	Verify that the account is locked after a certain number of failed login attempts.	None	Email: aymantest85@gmail.com Password: Ayman_test123	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email 3. On the next page, enter the valid password 4. repeat steps 1,2,3 five times	There should be warning then account should get locked for a certain duration of time	Account never get locked after so many attempts	Fail		High
TC_MyList_ListExist_001	My Lists	Verify My List Creating doesn't dissappear	Verify Lists Created doesn't dissappear after sign out , login	Lists Created	1.List: Test, Personal, Work 2.Email: aymantest85@gmail.com Password: Ayman_test123"	1. open any.do app, navigate to homepage 2. tap on + icon under My lists 3. Add Test List 4. tap on my day icon or next days 5. tap on options (3 dots) on top right corner 6. tap on settings then profile then sign out 7. login again 8. navigate to homepage and observe my Lists	User should have his previous List unchanged and no any new lists are created	User has his previous lists and nothing dissappears/gets deleted	Pass		High

TC_MyList_ListExist_002	Verify that Lists doesn't appear automatically	Verify that Lists doesn't appear automatically after sign out , login	Lists Created	Email: aymantest85@gmail.com Password: Ayman_test123	1. open any.do app, navigate to homepage 2. tap on my day icon or next days or all tasks 3. tap on options (3 dots) on top right corner 4. tap on settings then profile then sign out 5. login again 6. navigate to homepage and observe My Lists	User should have his previous List unchanged and no any new lists are created	Welcome to Any.do List is automatically created with 10 taks everytime user sign in after he signs out	Fail		Medium

Software Bug Report

Project name:		Any.do mobile Application																		
Bug ID	Title/Summary	Issue type	Classification	Environment	Affected Devices	Network	ReproducibleSteps	Expected result	Actual result	Attachment	Severity	Priority	Impact	Status	Notes/Comments	Reporter	Assigned To	Reported on	Due date	Date closed
BUG_MyList_ListExist_001	A List is being created automatically (Duplicate) every time user sign out then Login	Bug	UI/Usability			Wifi - Mobile data	1. Open any do app. Login Email: <aymantest85@gmail.com> Password: Ayman_test123 and enter Homepage 2. Tap on my day icon or next days or all tasks 3. Tap on options (3 dots) on top right corner 4. Tap on settings then profile then sign out 5. Login again 6. Navigate to homepage and observe My Lists	User should have his previous List unchanged and no any new lists are created	Welcome to Any.do List is automatically created with 10 tasks everytime user sign in after he signs out	BUG_MyList_ListExist_001.mp4	Major	Medium	User may experience data duplication, leading to confusion and inefficiency in task management	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_Security_AccountLockout_001	Account Never Looks after many unsuccessful Login attempts	Bug	Security			Wifi - Mobile data	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered email <aymantest85@gmail.com> 3. On the next page, enter the valid password <Ayman_test123> 4. Repeat steps 1,2,3 five times	There should be warning then account should get locked for a certain duration of time	Account never get locked after so many attempts (ex: 5 attempts)	None	Critical	High	Security issue, as this opens the account to brute-force attacks	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_Security_PasswordReset_001	Password reset link never expires	Bug	Security			Wifi - Mobile data	1. Request password recovery mail <aymantest85@gmail.com> Gmail pass: @Test_123 2. wait 48 hours 3. open the requested password recovery mail 4. observe if the recovery link expires after this period	Password reset link should expire after a certain period (ex: 24hrs)	password reset link never expires and can be used after 48 hours	None	Critical	High	Serious security flaw, as an expired link is a standard security measure to prevent unauthorized access	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_Security_PasswordReset_002	Password reset link can be used infinite number of times	Bug	Security			Wifi - Mobile data	1. Request password recovery mail 2. open the requested password recovery mail, mail <aymantest85@gmail.com> Gmail pass: @Test_123 3. recover the password to <Ayman_test123> 4. Login with recovered password 5. signout 6. Open the password recovery mail 7. recover the password to <Ayman_test1234> 8. Login with recovered Password	Password reset link should be only used once for each request and become invalid after	Password reset link can be user over and over again (no restrictions)	None	Critical	High	This security issue can allow anyone with the link to continuously reset passwords, leading to unauthorized access	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_Security_PasswordReset_003	User Can create new password same like the old password exactly	Bug	Security			Wifi - Mobile data	1. Request password recovery mail 2. open the requested password recovery mail 3. recover to New Password <Ayman_test123> (i.e Old Password is Ayman_test123) 4. Observer for any warnings / rejections 5. login with recovered password	User should not be able to use the same old password for the new password for better security reasons	User can set the new password same as the old password without any problems and can login in normally with the new created password	None	Major	Medium	While not a security breach, this weakens security by allowing users to reuse compromised passwords	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_Interrupt_Login_001	Irrelevant Error Msg is displayed when interrupting login process	Bug	Reliability			Wifi - Mobile data	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on the email field on the first page and enter a registered mail <aymantest85@gmail.com> Gmail pass: @Test_123 3. On the next page, enter valid password 4. Tap on sign in & once it starts loading close the app 5. re open the app and observe app behavior	App should either normally continue/open homepage normally or display error to re login	App shows irrelevant error message "Cannot Complete Upgrade. Please Verify you have internet connection to complete application upgrade" but proceeds to homepage normally and opens the app.	BUG_Interrupt_Login_001.mp4	Minor	Low	Confuses users but does not affect core functionality	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_TaskSync_001	Attachment is not uploaded or no given warnings/alerts when force closing the application while uploading an attachment to a task	Bug	Reliability			Wifi - Mobile Data	1. open any.do app. tap on my list 2. navigate to a created task <Prepare Lunch> 3. add any pdf <Fitness PDF> 4. tap on upload the pdf and close the app 5. open the app again and navigate to the task 6. observe the task attachments	App should either have the attachment uploaded or at least give a warning that it couldn't upload needed attachment	App doesn't upload the attachment and no warning or any other triggering events happens	BUG_TaskSync_001.mp4	Medium	Medium	This disrupts task management, potentially causing data loss without user awareness	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_UIUX_InputField_001	Text overlaps the username field frame when writing large number of characters	Bug	UI/Usability			Wifi - Mobile data	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on Email field & Enter a valid email (Not existing) so you can access the Username field 3. Tap Continue 4. Tap on Username field & Enter given username <write until you exceed the frame> 5. Observe username field borders and written text	Input field should be properly aligned, and last entry should function smoothly without overlapping or clipping.	Input test gets out of boarder of the aligned input field and overlaps the aligned frame	BUG_UIUX_InputField_001.mp4	Minor	Low	Issue affecting UI but not impacting functionality	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_UIUX_PasswordChange_001	Wrong page is displayed When you redirect to the app after you recover password	Bug	UI/Usability			Wifi - Mobile data	1. Open the mail recieved 2. Tap on the reset password link 3. Enter new desired password <Ayman_test123> 4. Re Enter correct desired password <Ayman_test123> 5. open Any.do mobile app & click on mail icon bottom left 6. tap on email field on first page and enter registered email 7. Enter the new password <Ayman_test123> 8. submit & wait for re-direction 9. Observe the page displayed	The user should be redirected to login/ home page after password confirmation.	The user is redirected to a page displaying "Check your inbox for instructions" after password confirmation.	BUG_UIUX_PasswordChange_001.mp4	Medium	Medium	Leads to confusion and disrupts the intended flow after recovering a password	New	This Bug mainly occurs when you don't close the application after you click on recover password. You click on recover password then switch to gmail and then proceed with required steps then wait for redirection, the bug occurs	Ayman ElGendy	Instabug	6/9/2024		

BUG_UIUX_SocialLogin_001	Unexpected OK window appears after cancelling facebook login option	Bug	UI/Usability	IOS Iphone 11 Pro Max IOS 17.5.1 Application Version 5.46.5	Iphone 11 Pro Max - Iphone Xr	Wifi - Mobile Data	1. open any.do app, tap on facebook icon 2. wait for the alert box and tap on "Cancel" 3. observe the screen	Normal operation of the app to main menu and No "OK" window should appear unnecessarily after canceling Facebook login	An "OK" window appears unexpectedly after canceling the Facebook login	BUG_UIUX_SocialLogin_001.mp4	Minor	Low	inconvenience to the user but doesn't break functionality	New	Some might consider this not a bug but This bug doesn't happen in google login option.	Ayman ElGendy	Instabug	6/9/2024			
BUG_UIUX_Navigation_001	Back option disappears in forget password page	Bug	UI/Usability			Wifi - Mobile Data	1. open any.do app tap , tap on mail icon and enter mail <aymantest85@gmail.com> 2. tap on "Forgot Password" 3. observe "< Back" on top left 4. tap on back option 5. tap on forgot password again 6. Observe "< Back" on top left	The "Back" option should remain available after clicking "Forgot Password" again.	The "Back" option disappears after selecting "Forgot Password" again, requiring the user to close the app or proceed.	BUG_UIUX_Navigation_001.mp4	Medium	Medium	Navigation issue that may cause frustration as users are unable to return to the previous page	New	It is frustrating for users to miss the back option and require to close and open the application and re apply all the steps again	Ayman ElGendy	Instabug	6/9/2024			
BUG_Calendar_Details_001	Displayed page data after event edited is not changed	Bug	Functionality			Wifi - Mobile Data	1. Open any.do app, Login Email: <aymantest85@gmail.com> Password: Ayman_test123 and enter Homepage 2. tap on Calendar in bottom icon list 3. Choose Any Event Created before (ex <Workout Time>) 4. Tap on EDIT icon on top right 5. Change the Date to any (ex <11 September>) 6. Tap on done on top right	The event updated/edited data should be changed immediately (Date / Time should be updated)	The event updated/edited data is not changed. Has the old Event Timing	BUG_Calendar_Details_001.mp4	Medium	Medium	This can cause incorrect data display, leading to confusion	New	The event gets updated once you close the displayed screen and then re open the event again	Ayman ElGendy	Instabug	6/9/2024			
BUG_Calendar_Details_002	Displayed page EDIT icon is not accessible (You can't tap on it) after editing an event	Bug	UI/Usability			Wifi - Mobile Data	1. Open any.do app, Login Email: <aymantest85@gmail.com> Password: Ayman_test123 and enter Homepage 2. tap on Calendar in bottom icon list 3. Choose Any Event Created before (ex <Workout Time>) 4. Tap on EDIT icon on top right 5. Change the Date to any (ex <11 September>) 6. Tap on done on top right 7. Observe Page displayed	The event data should be updated and allow user to use the "EDIT" icon again	The EDIT icon is not accessible (You can't tap on it)	BUG_Calendar_Details_002.jpg	Medium	Medium	Affects the user's ability to further modify the event after making an edit, limiting functionality	New	The event gets updated once you close the displayed screen and then re open the event again	Ayman ElGendy	Instabug	6/9/2024			
BUG_OptionsMenu_Sync_001	Cannot click on sync icon when internet is disconnected / No error are displayed regarding this issue	Bug	UI/Usability			None	1. Disconnect from the internet 2. Open any.do app, Login Email: <aymantest85@gmail.com> Password: Ayman_test123 and enter Homepage 3. tap on Calendar in bottom icon list 4. tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 5. tap on options (3 dots) icon from top right 6. tap on sync/refresh icon	The app should display an error message (e.g., "No internet connection").	Sync icon is not reachable/unclickable and The app doesn't display an error message "It displays Last Sync (Counts from the last sync) ex. Just Now, minute ago, ..."	BUG_OptionsMenu_Sync_001.jpg	Medium	Low	Syncing tasks is essential for the app's functionality; the lack of an error message leaves users unaware of the issue	New	Even though it might be normal or seem normal but at least there should be an display msg or any relevant thing to state that syncing is not available	Ayman ElGendy	Instabug	6/9/2024			
BUG_Profile_DeletePicture_001	unable to delete this profile picture at all. After uploading profile picture	New feature	Functionality			Wifi - Mobile Data	1. Open any.do app, Login Email: <aymantest85@gmail.com> Password: Ayman_test123 and enter Homepage 2. tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 3. tap on options (3 dots) icon from top right 4. tap on settings 5. tap on profile 6. tap on Edit under Profile Picture 7. observe if there is any delete option displayed	Delete Picture Option should be there to delete the profile picture	No delete profile picture option, you can't delete your profile picture once uploaded	BUG_Profile_DeletePicture_001.mp4	Medium	Low	Affects user experience and customization, but doesn't impact core app functionality	New	Even though it might be not required or stated in the requirements but it is crucial to have this option "What if a user uploaded wrong photo" and doesn't want to choose another one but wants to delete it?	Ayman ElGendy	Instabug	6/9/2024			
BUG_Signup_Invalid_001	Signing up with wrong/Non Existing Domain	Suggestion	Syntax			Wifi - Mobile Data	1. Open Any.do mob Application & Click on the mail icon bottom left 2. Tap on email field and Enter invalid email format <ayman@h.net> 3. Tap Continue 4. Observe error message	An error message should be displayed, indicating that the email format is invalid.	Signup proceeds to next page requesting (Full name, Password) with no error messages display	BUG_Signup_Invalid_001.mp4	Major	Medium	Allows users to sign up with invalid email addresses, which can lead to communication or login issues later	New	Clarification Needed with the development team or specific validation rules/requirements, as Format wise TC Pass, but could fail because ".h" is a very short domain name too.	Ayman ElGendy	Instabug	6/9/2024			
BUG_TaskCreation_001	Application allows taking any length of text when creating tasks	Suggestion	Syntax			Wifi - Mobile Data	1. Open any.do app, Login Email: <aymantest85@gmail.com> Password: Ayman_test123 and enter Homepage 2. tap on next 7 days icon on bottom 3. tap on "I want to..." on the bottom and Enter the data <Very Long Text> 4. Observe if any alerts / warnings / restrictions occurs	App should display a warning or give a certain maximum length	App takes any length of task title length with no restrictions	None	Minor	Low	poor user input validation can result in excessive or unwanted data, but doesn't directly harm app functionality	New		Ayman ElGendy	Instabug	6/9/2024			
BUG_TaskCreation_002	Application uploads any file with no warnings/errors	Suggestion	UI/Usability			Wifi - Mobile Data	1. open any.do app.Login Email: <aymantest85@gmail.com> Password: Ayman_test123 and enter Homepage 2. tap on my list 3. navigate to a created task <Prepare Dinner> 4. add random/unsupported file <.data> 5. upload and observe the task attachments	App should give a warning or reject the file format	App uploads the file but it cannot be displayed (i.e has no effect)	BUG_TaskCreation_002.mp4	Medium	Low	poor file validation can lead to unwanted or unsupported files being uploaded, impacting task management	New	Application uploads any file even though it is not supported How did i know? The application allowed the upload of the file but couldn't access its data.	Ayman ElGendy	Instabug	6/9/2024			
BUG_Settings_Language_001	Changing the application Language, doesn't fully translate all the language over the application	Bug	Syntax			Wifi - Mobile Data	1. open any.do, tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 2. tap on options (3 dots) icon from top right 3. tap on settings 4. navigate to language 5. tap on language 6. change language From English to Arabic 7. Observe the changes in the app	The app should entirely change text, task all features to arabic language	The app is mixed between english and arabic format	BUG_Settings_Language_001.jpg	Medium	High	This issue can lead to inconsistencies in the user experience, especially for users who rely on full language support. It can affect the usability and professionalism of the application, but it does not prevent the core functionality from working.	New		Ayman ElGendy	Instabug	6/9/2024			

BUG_Profile_UploadVideoProfilePic_001	User can upload a video in profile picture	Bug	UI/Usability				Wifi - Mobile Data	1. tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 2. tap on options (3 dots) icon from top right 3. tap on settings 4. tap on profile 5. tap on Edit under Profile Picture	User should be able to upload a profile picture in a picture format & handle/reject video format	User is able to upload a video in profile picture without giving any warnings/errors	TC_Profile_UploadVideoProfilePic_001.mp4	Minor	Medium	Allowing videos as profile pictures can lead to unintended UI issues or performance problems. It may also affect user experience and application behavior, but it doesn't fundamentally break core functionalities. It could be a significant problem if it affects app performance or violates design constraints.	New		Ayman ElGendy	Instabug	6/9/2024		
BUG_Settings_WeekStartDay_001	"Week Start Day" resets to default each time user signs out and log in	Bug	Functionality				Wifi - Mobile Data	1. open any.do, tap on My Day icon or next 7 days or all tasks or calendar icon bottom left 2. tap on options (3 dots) icon from top right 3. tap on settings 4. navigate to week start on 5. change from Monday to Sunday 6. sign out from the application 7. login to the application 8. repeat steps 1,2,3,4 9. Observe the Day	The app should save and keep the "Week Start On" as selected before without any changes under any conditions	The app "Week Start On" day is changed to default each time after signing out of the application and then logging in	BUG_Settings_WeekStartDay_001.jpg	Critical	High	This issue affects the user's ability to maintain their preferred settings for week start day, which is crucial for effective task and time management. It can lead to confusion and disrupt the user's workflow, especially if the week start day setting is used for scheduling and planning tasks.	New	it is critical because, if a user has a tasks/events set depending on the week start day, and he signs out and login for any reason, all this data will be inaccurate and not working	Ayman ElGendy	Instabug	6/9/2024
